

Sarah Corcoran

I build what I design and turn complex problems into simple, purposeful experiences using AI as a creative and engineering partner.

BambooHR Senior Product Designer

Production app shipped solo

7 years Product Design

EXPERIENCE

Senior Product Designer, AI Design Lead

BambooHR · Lindon, UT · Sep 2019 – Oct 2021, Jan 2023 – Present

Primary designer shaping AI across BambooHR's product org, defining interaction patterns, component strategy, and design direction that every team builds on

Redesigned Ask BambooHR from a basic chatbot into a proactive AI assistant with suggested prompts, draft receipts, and intelligent surfacing

Created three reusable AI components shipped into the design system and adopted by 15+ product teams

Designed and built a full-stack AI Agent Tracker solo using Claude Code. In production and used daily by executive leadership to track AI initiatives across the org

Run the AI Braintrust, a 10-designer cross-functional group focused on pressure-testing patterns and driving org-wide AI consistency

Product Designer

Lucid Software · South Jordan, UT · Oct 2021 – Dec 2022

Designed features for enterprise customers, interfacing directly with them to balance stakeholder demands with user-centered design best practices

Owned design end-to-end in a fast-moving environment where priorities shifted often and learning was the output

Design Mentor

DevMountain · Lehi, UT · Jun 2019 – Oct 2022

Mentored 200+ aspiring designers across 6+ cohorts through an immersive UX bootcamp, coaching on process, portfolio craft, and career strategy

EDUCATION

Brigham Young University

BS Exercise & Wellness · Business Minor · 2017

DevMountain

UX Design · 2019

BUILDING WITH AI CHANGED HOW I DESIGN

I prototype and ship production apps in Claude Code, from clickable flows to deployed tools with auth and real-time data. AI accelerates my entire process: exploration, iteration, critique, and engineering handoff.

SKILLS & TOOLS

Design & Strategy

0→1 product design, complex-to-simple UI, information architecture, design systems, AI interaction patterns

Prototyping & Build

Claude Code, Figma, React, HTML/CSS, Supabase, Firebase, Vercel

Ways of Working

Autonomous execution, rapid experimentation, usability testing, cross-functional leadership
